ARES Product Comparison

Choosing the right CMS or e-Commerce system for your needs is essential to getting the most out of your online development project. ARES has several best-of-breed applications which allow any organisation to take their business to the online. To help you in deciding what is best for you, ARES have created this fact sheet to compare our major product offerings.

Given that web applications are designed to satisfy different organisational requirements it is important to make the right choice. ARES is committed to providing a best-of-breed approach to providing leading solutions from different providers based on a detailed assessment of their comparative benefits. We know that choosing the right application can be confusing and time consuming, so we have helped narrow down a selection of internationally regarded web solutions. We have also provided this comparison guide to help you choose. ARES has assembled a range of applications which we will configure, customise and deploy to deliver great results!

For further information on ARES services or to arrange a meeting to discuss your online needs, call ARES on 1300 762 912 or visit us at www.ares.com.au
