EPiServer CMS 5 Licensing

Enterprise CMS Licensing & Service Level Agreements

EPiSERVER

Online... and beyond

01 Enterprise CMS 5 Licensing Overview

How does EPiServer work?

EPiServer consists of a basic platform (core), which contains all the basic functionality that is available to editors and administrators. For each individual website, a customized solution is created on top of the platform, which makes the website unique for visitors. The way in which you work as an editor or administrator is generally the same for all Web sites based on EPiServer.

EPiServer uses Microsoft Internet Information Server (IIS) as a Web server to handle Web publication. All the information displayed on these Web pages is stored behind the scenes in a MS SQL database. The web server and the database are run on a Windows server. EPiServer uses the same authorization model as Windows, which means authorization work is extremely simple.

Purchasing EPiServer

EPiServer is sold through certified partners such as ARES. We assist with business requirements, development, integration, training, support and assisting you to optimise your licensing arrangements. EPiServer does not sell licenses directly to customers, whereby ARES would purchase the license on behalf of its clients who will thereafter become the 'licensee.'

Software Subscription

The Software Subscription entitles customers to EPiServer upgrades for a period of 12 months. Product upgrades are ordered and supplied by ARES, whereby Installation and implementation of the upgrade is not included in the Software Subscription. The Software Subscription is shown as an entry on the invoice and is connected to one license number.

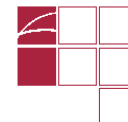

The Software Subscription is renewed automatically on a 12 month running basis, unless terminated at least 3 months prior to its expiry.

EPiServer reserves the right to change the scope and content of the Software Subscription in conjunction with its renewal or at the purchase of a new Software Subscription.

Deposit of Source Code - ESCROW

With the option of an agreement covering the deposit of source code in escrow, we offer all our customers extra protection for their investment in EPiServer. The agreement is a small additional cost to the initial License.

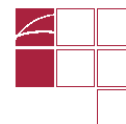

02 Enterprise CMS Licensing Terms & Price List

EPIserver 5 Professional - Single Site Licenses

Description	Price (excludes GST)
<p>General Use & Limitations</p> <p><i>Primary license - All customers must initially purchase a primary license. A primary license can be an EPIserver Entry License, EPIserver or EPIserver Enterprise License.</i></p> <p><i>The EPIserver 5 Professional License is valid for one (1) EPIserver application. Each unique application consists of a Web site or a virtual directory within Internet Information Services (IIS).</i></p> <p><i>All EPIserver 5 licenses support an unlimited number of users.</i></p>	
<p>EPIserver Entry License</p> <p><i>One EPIserver CMS version 5.x license for one (1) website and database on one server. The license supports an unlimited number of users. The Entry License is a primary license.</i></p> <p>Software Subscription EPIserver Entry License*</p>	<p>\$18,000</p> <p>\$3,600</p>
<p>EPIserver CMS Additional License</p> <p><i>One EPIserver CMS version 5.x license for one (1) Web site and database on one server. This is an additional license for customers who have already purchased an EPIserver</i></p> <p>Software Subscription EPIserver Additional License*</p>	<p>\$9,600</p> <p>\$1,920</p>
<p>EPIserver Test License</p> <p><i>One EPIserver CMS version 5.x license for one (1) Web site and database on one server. The license can only be used for internal testing, code deployment and training purposes</i></p> <p>Software Subscription EPIserver Additional License*</p>	<p>\$4,800</p> <p>\$960</p>
<p>EPIserver CMS Rental License, per month</p> <p><i>One EPIserver CMS version 4.x and 5.x license for one (1) Web site and database on one server. The EPIserver CMS Rental License is charged monthly, with a contract period of six (6) months at a time. The contract period will automatically be extended for another six (6) months unless 30 days' written notice of termination is received prior to the expiry of the contract. Software subscription is included in the monthly fee.</i></p> <p>Software Subscription EPIserver Rental License*</p>	<p>\$1080</p> <p>N/A</p>
<p>EPIserver CMS 12-Month Customer Developer License</p> <p><i>One EPIserver CMS version 4.x and 5.x license for one (1) Web site and database on one server, with an unlimited number of users. This license, which is of limited duration (12 months) is for end customers. The license is not for commercial use. The license is a client license and may only be used on developer sites in a developer environment.</i></p>	<p>\$1200</p>
<p><i>*Software subscription is 20% of the valid price for the relevant year. The software subscription is valid for 12 months and must always be ordered in conjunction with the license. If the software subscription is not purchased in conjunction with the license, any future upgrades will be processed as a new order, and the new license cost will apply. Software subscription is extended by 12 months on an ongoing basis unless the end user terminates the agreement 3 months before the expiration date.</i></p>	
<p><i>Previously purchased EPIserver licenses can be upgraded to EPIserver Load Balancing Licenses or Enterprise License. Please contact ARES for upgrade prices.</i></p>	

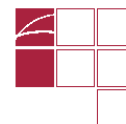

02 Enterprise CMS 5 Licensing Terms & Price List

EPIserver 4 Enterprise - Multi Site Licenses

Description	Price (excludes GST)
<p><i>The EPIserver 5 Enterprise License is valid for fifteen (15) EPIserver applications. Each unique application consists of a Web site or a virtual directory within Internet Information Services (IIS). Each Web site in IIS may only include one EPIserver; this limitation is purely for technical reasons. When a customer uses several domains, different scenarios affect the number of Web sites within EPIserver that need to be created in IIS. This, in turn, will affect the number of licenses that must be purchased. Please contact ElektroPost if you have any questions.</i></p>	
<p>EPIserver CMS Enterprise License</p> <p>One EPIserver CMS version 5.x license for 15 Web sites configured with one shared database or separate databases. The features in Enterprise differ, depending on configuration, for templates, file share, and administrator levels, etc. for the Web sites. The Enterprise license can only be installed on one server, but supports a load-balanced environment with up to four (4) load-balanced Web servers in a server cluster. The Enterprise License may also be the customer's primary license. EPIserver Enterprise Licenses are supplied with one license key for each server.</p>	\$51,600
<p>Software Subscription EPIserver Enterprise License*</p>	\$10,300
<p>EPIserver CMS Enterprise Add-On License</p> <p>Extending the Enterprise License with ten (10) additional Web sites with one shared database or separate databases. The license can only be installed on one server, but supports a load-balanced environment with up to four (4) load-balanced Web servers in a server cluster.</p> <p>When ordering Enterprise Add-On License, the EPIserver Enterprise license key will be replaced with a new license key. This is an additional license for customers who have already purchased an EPIserver Enterprise License. More Web sites can be added to the Enterprise license by purchasing additional Enterprise Add-On Licenses. Note that there may be limitations in operating systems, hardware and memory requirements in large installations with many Web sites on one server.</p>	\$30,000
<p>Software Subscription EPIserver Enterprise Add-On License*</p>	\$6,000
<p>EPIserver CMS Enterprise Staging License</p> <p>One EPIserver CMS version 4.x and 5.x license for 15 Web sites configured with one shared database or separate databases. The features in Enterprise differ, depending on configuration, for templates, file share, and administrator levels, etc. for the Web sites. The Enterprise license can only be installed on one server, but supports a load-balanced environment with up to four (4) load-balanced Web servers in a server cluster. EPIserver Enterprise Licenses are supplied with one license key for each server. The license can only be used in a staged environment, as a part of information staging in an offline environment. This is an additional license for customers who have already purchased an EPIserver primary license.</p>	\$25,000
<p>Software Subscription EPIserver Additional License*</p>	\$5,000
<p>EPIserver CMS Enterprise Test License</p> <p>One EPIserver CMS version 4.x and 5.x license for 15 Web sites configured with one shared database or separate databases. The features in Enterprise differ, depending on configuration, for templates, file share, and administrator levels etc. for the Web sites. The Enterprise license can only be installed on one server, but supports a load-balanced environment with up to four (4) load-balanced Web servers in a server cluster. EPIserver Enterprise Licenses are supplied with one license key for each server. The license can only be used for internal test use, code deployment and training purpose in an offline environment. This is an additional license for customers who have already purchased an EPIserver primary license.</p>	\$18,000
<p>Software Subscription EPIserver Additional License*</p>	\$3,600
<p>EPIserver CMS Enterprise 12-Month Customer Developer License</p> <p>One EPIserver CMS version 4.x and 5.x license for twenty-five (25) Web sites with one shared database or separate databases. This license, which is of limited duration (12 months), is for end customers. The license is not for commercial use. The license is a client license and may only be used on developer sites in a developer environment.</p>	\$6,000
<p>*Software subscription is 20% of the valid price for the relevant year. The software subscription is valid for 12 months and must always be ordered in conjunction with the license. If the software subscription is not purchased in conjunction with the license, any future upgrades will be processed as a new order, and the new license cost will apply.</p> <p>Software subscription is extended by 12 months on an ongoing basis unless the end user terminates the agreement 3 months before the expiration date. Previously purchased EPIserver licenses can be upgraded to EPIserver Load Balancing Licenses or Enterprise License. Please contact ElektroPost for upgrade prices.</p>

03 Enterprise CMS 5 Tech Update

EPIserver is 100% based on Microsoft .NET, a technology launched by Microsoft to meet the demands that may be places on technology in the future. Ever since the first version, EPIserver has been at the cutting edge of technology and utilized the very latest developments in order to make the platform as efficient and functionality rich as possible.

Scalable, Reliable & Based On Standard Products

EPIserver is a scalable and reliable solution. The platform is based on standard products from major well-known suppliers, such as Microsoft and Oracle, and is suited to both simpler and more complex websites with several thousand simultaneous users.

Web Services – Enable Integration

In order to enable and simplify integration with other systems, EPIserver is available with three web Services: SOAP (Simple Object Access Protocol), WSDL (Web Services Description Language) and WSRP (Web Services for Remote Portlets). Web Services is a standard formulated by W3C, which enables integration of different systems via HTTP. The standard is an important cornerstone in the building of independent, distributed systems via the Internet.

Open Development Architecture

ODA stands for Open Development Architecture and its purpose is to make EPIserver more adaptable in order to be able to meet the demands of all customers. It should be easy for a supplier to develop solutions that can be integrated in EPIserver.

Load Balancing & Quality Assurance

EPIserver supports load balancing. This means that if you have a website with high visitor traffic or high demands on security or accessibility, traffic to the website can be directed and distributed over multiple servers. Incoming traffic on the website is directed to the server with the greatest capacity. EPIserver also has a dynamic cache that improves the system's performance by two to six times compared to a traditional dynamic web system. .NET's output cache is also automatically used when possible, which often dramatically improves performance.

Software Subscription

By purchasing a Software Subscription you get access to free upgrades of EPIserver for 12 months. Software Subscription is linked to each license number and is delivered by the partner that delivered the original EPIserver license. We offer all new and existing customers extra protection of their investment in EPIserver. A separate deposit contract for source code is included in the Software Subscription.

System Requirements

- Windows 2000 Server or Windows 2003 Server
- Microsoft .NET Framework 2.0
- Microsoft SQL 2000, SQL 7.0, Oracle 9i release 2 or Oracle 10g
- Microsoft IE 6.0 or higher for editors and administrators
- For publication via Microsoft Office, Office 2007, Office XP or Office 2003 is required
